LVP & Laminate Care: The Basics

For luxury vinyl plank and tile (LVP, LVT) and laminate floors.

Right away

- **Furniture and area rugs can go back right away.** Put felt pads under every furniture leg first.

Every week

- **Vacuum or dust mop.** Hard-floor setting, or microfiber. Grit is what scratches.
- **Clean with Bona Hard-Surface Floor Cleaner** and a microfiber mop. A light mist is plenty.

Never

- **Wet mops or buckets of water.** Wipe up spills right away: water at laminate seams makes the boards swell.
- **Rubber-backed mats on vinyl.** Rubber can stain it.
- **Steam mops that leave a puddle,** or any steam mop if your floor's manufacturer says no.

Good to know

- Vinyl and laminate **can't be recoated or refinished**. A damaged plank is replaced, so keep a few spare planks, and let everyday care keep the rest looking new.
